

# Egress Rate

## Apex 2.0, ApexPlus 2.0, GigaPlus 3.0

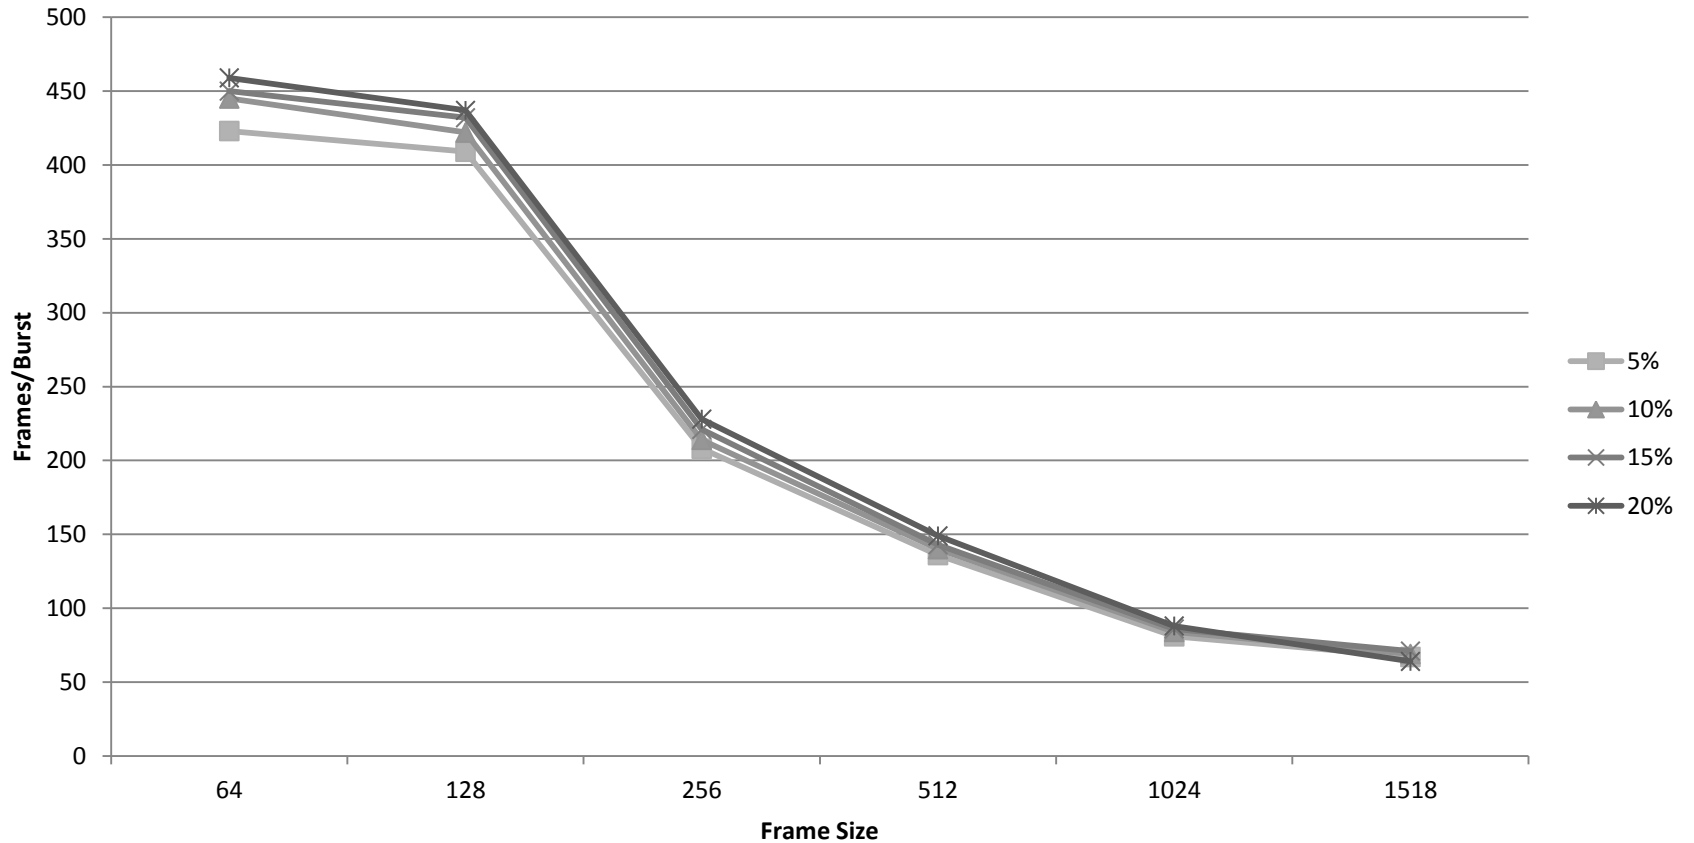

- Allows fine tuning of QoS strictness
- 5-20% Range
- Default 10%
- Smaller % is tighter control, but less throughput
- Larger % max throughput, higher likely hood of dropping a critical packet

# Egress Rate vs. Throughput

## Layer 2 Throughput

# Egress Rate – Back to Back (Burst)

# Egress Rate - Latency
